Fourth ESPE Advanced Seminar in Developmental Endocrinology

Developmental Biology and Disorders of Cartilage and Bone

Stockholm, 30 June- 1 July 2010

GUIDELINES FOR APPLICATION

General Conditions

The purpose of the Seminars in Developmental Endocrinology is to combine basic science and clinical pediatric endocrinology. Thus, the main intention is to attract young physicians as well as researchers to science in the field of pediatric endocrinology, especially developmental endocrinology.

The Seminar targets both pediatric endocrinologists with a good clinical experience (training about to be accomplished) and “post-doc” scientists with a documented special interest in either pediatric endocrinology or developmental endocrinology.

A maximum of 30 students will be selected on the basis of their CV's in order to foster maximal interaction between fellows and lecturers.

ESPE covers expenses for meals and accommodation but travel expenses are payable by the fellows.

ORGANIZERS

Cecilia Camacho-Hübner, Ola Nilsson and Lars Sävendahl

Division of Pediatric Endocrinology, Dept of Women's and Children's Health,
Karolinska Institutet, Stockholm, Sweden

Applications

Candidates must provide:

1. A brief CV and a short list of publications
2. A clear letter of motivation documenting interest for Pediatric Endocrinology and stating
 - Training in the specialty
 - Current position
 - Current research projects or fields of interest
 - Anticipated career plans
3. A letter of recommendation from the tutor in the field of Pediatric Endocrinology

DEADLINE FOR APPLICATION

Applications should be sent by e-mail to Susanne Hallberg (see address below), no later than **April 19, 2010**.

The selection committee will make its decision by April 20, 2010.

Accepted students will be asked to submit a case record or research abstract for presentation at the seminar.
