

ESPE Research Policy 2022

Approach

The mission of ESPE is to advance excellence in paediatric endocrinology, diabetes and bone disorders by promoting research, education and medical practice to the benefit of child and adolescent health throughout the world. Its vision is to be the leading society in paediatric endocrinology that aims for excellence in clinical care, research and education through innovation, collaboration and technology.

ESPE offers a number of fantastic funding opportunities, from prestigious awards to fellowships enabling members to further their career, as well as prizes and travel grants in recognition of outstanding abstracts submitted to the annual ESPE meeting – in collaboration with industry.

Opportunities

ESPE is proud to present six prestigious **awards** recognising members' outstanding achievements at different stages of their careers, across the field of paediatric endocrinology.

Grants and other fellowships provide opportunities for both young and senior members who want to build up a scientific, research and clinical career in paediatric endocrinology.

ESPE also awards **prizes and grants for abstracts, posters and papers** in recognition of their scientific contribution to our Annual Meeting and the *Hormone Research in Paediatrics* journal.

Priorities

ESPE focuses on taking discoveries from the lab bench to the patient's bedside. Priorities cover all fields of pediatric endocrinology and include new technologies such as machine learning.
